

Lu, Yi-Ping (Jolene)

jolene.yplu@gmail.com | +886 978971437 | Taipei, Taiwan

EDUCATION

National Taiwan University

Bachelor of Business Administration, Finance;
Business Analytics Program

Taipei, Taiwan

Expected June 2026

EXPERIENCE

Dcard

Data Analyst Intern, Business Intelligence Team

Taipei, Taiwan

February 2025 – August 2025

- Used SQL to extract, clean, and transform large-scale user behavior data, building reusable query templates and dashboard-ready datasets to support business analysis.
- Processed data based on stakeholder requirements and translated ambiguous business questions into structured metrics, analytical logic, and reporting outputs for subscription, retention, and user engagement monitoring.
- Developed Python-based text mining workflows to preprocess user-generated content and train a political keyword detection model, improving the efficiency of content classification and monitoring.

Yuanta Securities

Intern, International Institutional Sales (SBL Desk)

Taipei, Taiwan

October 2025 – December 2025

- Automated financial data processing workflows using Excel VBA to organize transaction records, client positions, and unsettled cash tables, improving reporting efficiency for daily institutional sales operations.
- Built web scraping workflows to collect stock split announcements and material corporate event information from the Market Observation Post System, transforming public disclosure data into structured outputs for internal reference.

Department of International Business, National Taiwan University

Research Assistant

Taipei, Taiwan

September 2025– February 2026

- Constructed and cleaned a 1.65M-observation analyst–firm–quarter panel by integrating multiple financial, analyst, and firm-level datasets, ensuring data consistency for empirical analysis.
- Built reproducible data processing workflows using Python and Stata to support variable construction, validation, and research-ready output generation.

PROJECT

Power BI Dashboard Practice with Public Dataset

Self-directed Project

Taipei, Taiwan

2025

- Built interactive Power BI dashboards using public datasets to support KPI tracking, business performance analysis, and executive-style insight presentation.
- Transformed raw datasets into dashboard-ready analytical views through data cleaning, relationship modeling, DAX measures, slicers, and category-level visual breakdowns.

SKILLS

- **Programming & Analytics:** Python, SQL, R, Stata, Excel VBA
- **Web Scraping & Data Processing:** Python web scraping, pandas, data cleaning, text preprocessing
- **BI & Visualization:** Power BI, dashboard development, data visualization, Excel
- **Business & Research:** Financial analysis, industry research, business insight generation
- **Languages:** Mandarin Chinese, English (IELTS 8.0)
